Selected applicants will receive a grant through the summer months to pursue research with one of the faculty members of the Computer Science Department of the University of Houston. The grant will include a stipend of $3,000 and travel reimbursement if the applicant is coming from outside the Houston metro area. The NSF REU grant mechanism is designed to promote the careers of students interested in pursuing graduate education. Participating students need to be enrolled in an accredited U.S. University and be U.S. citizens or permanent residents. We will give preference to rising seniors, but juniors and sophomores will also be considered if they have a strong record.

Program Dates:
May 30 - August 4, 2006

Qualifications:
• US citizens or Permanent residents
• Major in Science or Engineering in a US university
• Solid CS and Math background
• Proficient in C++, visual C++ or Java

Application Deadline: March 15, 2006 or until the positions are filled.
